

PermaPro Monkey Grip

PRODUCT DESCRIPTION :

PermaPro Monkey Grip is a safe, non-toxic, non-flammable and inert material that adds slip resistance to any concrete sealer. It is colorless and transparent so that it does not change the color or clarity of the coating.

HOW TO USE:

PermaPro Monkey Grip can be spread over the surface of the wet coating layer taking care to spread it evenly over the surface. When the layer is dry it should be over coated with a clear layer of sealer to lock in the additive and insure long wearing characteristics.

Alternately, PermaPro Monkey Grip may be premixed with the sealer and stirred in thoroughly to a uniform consistency. Add one Container to 5 Gallons of SDI Sealers . This mixture may be sprayed, rolled or brushed over the surface. Always stir the mixture occasionally during application.

When the treated layer is dry, over coat it with a clear sealer coat. This locks in the additive and gives long wearing characteristics

BENEFITS:

- The clear transparent beads do not affect the color or transparency of a clear coat or a color seal coating.
 - Inert – PermaPro Monkey Grip- is completely non-reactive. It will not affect the cure or drying time of acrylic or urethane coatings.
-

PROPERTIES and STORAGE :

Type : Colorless, inert slip resistant agent

Color : Colorless

Odor : Odorless

Flammability : Nonflammable

Storage : One year in original packaging.

Packaging :

Coverage :

WARNING :

Irritating to eyes. Gloves and protective clothing are always recommended for maximum protection.
