Decorative Concrete Price List

Solomon Color-Flo

Liquid Integral Color (**SEE COLOR CHART**)

Liquid colors are blended on site and bucketed for use according to your requirements. In comparison to powder and granular pigments, liquid has a superior dispersion rate to ensure a quick and uniform mix within the concrete, far less streaking, and less waiting. Custom colors can be achieved and we can match other manufacturer's color charts (pricing will vary).

64 Standard Colors -

- 1% Loading Column - \$23.95 / 1 yard of concrete (3500 psi)
- 2% Loading Column - \$45.31 / 1 yard of concrete (3500 psi)
- 3% Loading Column - \$67.31 / 1 yard of concrete (3500 psi)
- 4% Loading Column - \$87.92 / 1 yard of concrete (3500 psi)

Please Note: We sell many colors of POWDER to match liquid colors as well! Please Call or Ask for PRICES! ★

Brickform Color Hardener (40 Colors)

Brickform Color Hardener is available in 60 lb. pails. Competitors' colors may be matched with minimum quantity and lead time. Estimated coverage - 80-120 square feet per 60 lb. unit

Standard Colors-	\$41.95 per 60 lb. pail
Except Smokey Blue-	\$141.95 per 60 lb. pail ★

Brickform Antique Release (40 Colors)

Colors are available in 30 lb. pails only. Estimated coverage - 800-1,000 square feet per 30 lb. unit

Standard Colors-	\$72.95- 30 lb. pail
Except Smokey Blue-	\$220.95 per 30 lb. pail ★

SDI Liquid Release Agent-(BUBBLEGUM/CLEAR)

A cleaner alternative to powder release. It gives off a light, sweet odor and will fully evaporate within several hours.
Estimated coverage - 200-300 square feet per gallon.

\$25.95 per 1 gallon pail

\$85.95 per 5 gallon pail

Proline EZ-Tique Color Wash (SEE COLOR CHART)

39.50 per 3 lb. pail

EZ-TIQUE allows you antique stamped concrete anytime before or after sealer is applied. Apply EZ-Tique with a sprayer or broom over damp concrete to allow it to settle properly. EZ-TIQUE must be sealed to lock in the color.

Estimated coverage: 2000-3000 ft² per 3 lb. pail

Also Available In- ★ **BRICKFORM VERSION ANTIQUE-IT** ★

★ SDI Concrete Stain System ★

The SDI concrete stain system incorporates the products needed to make any stained concrete job flow smoothly from beginning to end. Initial cleaning and degreasing products are included as well as stains for **INTERIOR** and **EXTERIOR** use. All products are available for individual purchase in 1 gallon containers.

SDI Super Blue Concrete Renovator- 5 GALLON-\$118.95/ 1 GALLON-\$28.35

Super Blue is a mild acidic detergent that etches and cleans any concrete surface. Its use is recommended prior to applying stain to enhance the color and penetration of the stain as well as increase adhesion of the sealer. It is not necessary to neutralize before sealing. Dilute Super Blue with 3 parts water to 1 part Super Blue, spray or mop over the concrete surface applying liberally. Allow to penetrate for about 5 minutes, scrub lightly with brush or broom then rinse thoroughly and allow to dry completely. If spraying, use acid resistant sprayer.

Concrete Stains And Dyes

Concentrated Acid Stains

\$55.05 per gallon

SDI Concentrated Acid stains are a reactive stain available in 10 colors for both interior and exterior use. This concentrate can be diluted 1:1 with water for improved coverage with little color change. Apply with a plastic sprayer or mop at a rate of **150-200 ft²** per diluted gallon. Allow stain to react for 4-6 hours before neutralizing. Rinse well, making sure to remove residue. Allow the surface to fully dry prior to sealing (a minimum of 24 hours).

★ ****BOLD LETTER COLORS ARE FOR EXTERIOR ONLY!**** ★

Dye Concentrate- **INTERIOR DYE-**

SDI Dye Concentrate

Decorative Concrete Color Dye System - 28 Great Colors.

Light Gray*	Medium Gray*	Dark Gray*	Lime*
Sun Buff*	Buff*	Taupe*	Teal*
Raw Sienna	Black	Chestnut	Chocolate Brown
Glacier	Forest Green	Burnt Sienna	Egg Plant
Dixie Red	Sand	Turquoise	Saddle Brown
Terra Cotta	Gold	Midnight Black	Slate Blue
Green	Mahogany	Caramel	Walnut

SDI Dye Concentrate is a translucent dye designed to penetrate and color any cementitious surfaces, including polished concrete. SDI Dye is designed to create a mottled look similar to an acid stain in 1/3 of the time. 20 standard colors can be combined to create an unlimited color palate. SDI Dye Concentrate is sold in concentrated form to be mixed with acetone prior to use. One finished gallon of SDI Dye will cover 400-600 ft².

Concrete Sealers, Cure & Seals, and Finishes

Price breaks at 12, 18, and 36 pails (Call for more information)

SOLVENT BASED SEALERS

SDI Stamp Seal Klear Gloss 2.0 - Pure acrylic concrete sealer

\$145.95 per 5 Gallon

\$37.50 per 1 Gallon

Klear Gloss 2.0 is a VOC compliant, medium to high gloss clear sealing compound that will not yellow. It is packaged ready to use in five gallon pails. Klear Gloss is best applied to clean, new or old concrete with a short nap roller or airless sprayer at the rate of 200-300 ft² per gallon. A second coat may need to be applied if desired. Sealing should not be done until all surface water has evaporated (preferably a minimum of 24 full hours after rinse, rain, or new placement). Klear Gloss 2.0 is our number "1" recommendation for exterior Decorative Concrete.

SDI Stamp Seal Satin - Pure Acrylic Concrete Sealer

\$154.95 per 5 Gallon

\$39.50 per 1 Gallon

SDI Stamp Seal Satin is a low molecular-weight/ low-moderate gloss curing and sealing compound packaged ready to use in a 5 gallon pail. "Satin" is best applied to clean, new or old concrete with a short-medium nap roller at a rate of 250-350 square feet per gallon. A second coat may be applied if desired. Sealing should not be done until all surface water has evaporated (preferably a minimum of 24 full hours after rinse, rain, or new placement).

SDI Solvent Based Tint Concentrate

\$50.00 per quart

Add color to any solvent-based sealer. One quart will tint 5 gallons, add less for subtle color toning. Available in 12 standard colors.

WATER BASED SEALERS (Environmentally Safe)

SDI Stamp Seal AquaSeal - Water-Based Acrylic Cure&Seal (ASTM-C309)

1 Gallon- \$24.95

5 Gallon- \$109.95

SDI Stamp Seal AquaSeal is a medium to low gloss, non-yellowing cure and seal. It is packaged ready to use in a five gallon pail. Should be applied with a short-nap roller or sprayer at a rate of 250-400 ft² per gallon. Don't apply until all surface water has dissipated.

SDI Epo Shield

SDI Epo Shield is a premium water-based epoxy-modified acrylic cure and seal designed for INTERIOR applications. Epo-shield outperforms traditional acrylics in regards to flexibility, adhesion, chemical resistance and durability. Available in two finishes: gloss and satin. Epo-Shield Gloss gives a wet-look comparable to solvent based sealers, while Epo-Shield Satin will penetrate the substrate to give a low-gloss finish. Apply with a roller/sprayer at 250-400 ft per gallon applied in multiple thin coats.

Satin (20% Solids)

\$126.45 per 5 gallon

\$35.00 per 1 gallon

Gloss (38% Solids)

\$179.95 per 5 gallon

\$48.00 per 1 gallon

SDI Repel **75** - Penetrating Water Repellant- 1 GALLON-\$31.95/5 GALLON-\$120.55

Repel 75 is a **7.5%** active, water-based siloxane/silane water repellant and impregnating agent for vertical or horizontal porous masonry surfaces such as concrete, block, brick, and unglazed tile. Repel 75 will penetrate and chemically bond deep within the substrate to provide long lasting protection against deterioration or staining due to water conditions. Repel 75 will not impair the natural breathing characteristics of treated substrates, nor will it produce a film. Apply with a roller, brush or sprayer at a rate of 100-300 ft² per gallon.

SDI Repel **120** - Penetrating Water Repellant

\$144.00 per 5 gallon

\$35.00 per 1 gallon

Repel 120 is a premium water repellant with **12%** active silane/siloxane for better performance characteristics than Repel 75

Chemical Products, Additives, and Accessories

SDI **Xposure** - Surface Retarder For Exposed Aggregate

\$74.95 per 5 gallon

Xposure is a concrete surface retarder for use on horizontal surfaces to produce a decorative exposed aggregate finish. Place and finish concrete prior to application of Xposure. For a decorative exposed aggregate finish, the surface may be seeded with desired aggregate, then lightly floated. Apply Xposure after surface water has dissipated by low-pressure sprayer at a rate of 200 square feet per gallon. Do not dilute, Xposure is packaged ready to use. Depending on temperature, Xposure can be removed along with the retarded surface mortar crust with a low pressure water spray and stiff brush in 8 - 24 hours past initial application.

SDI "**BONDACRYL**" - Acrylic Latex Bonding Agent And Admixture

\$29.95 per 1 gallon

\$94.95 per 5 gallon

Acrylobond can be used as a bonding agent / primer for overlays or as a performance-enhancing admixture for most site-mixed cementitious mortars, stuccos, cements, and repair products. Bondacryl increases bond strength, abrasion and impact resistance, tensile and flexural strengths, chemical resistance and aids in the control of shrinkage cracks.

3/4" Cut Polypropylene Concrete Reinforcement Fiber

\$6.97 per 1 lb bag

\$278.80/CASE(40-1LB)

Add 1 - 2 bags per yard of concrete directly into mixer. Bags will tear and dissolve allowing the fiber to disperse throughout the concrete mix. The addition of fiber as secondary reinforcement will dramatically increase the early green-strength of the concrete and aid in controlling shrinkage cracks.

Xylene - (Raw)Solvent

Fixing Issues w/ Solvent Based Sealers

1 Gal-\$22.95 and 5 Gal-\$79.95

Aromatic 100 - Solvent

Used for **THINNING** Solvent-Based Sealers

\$84.95 per 5 gallon

SDI Surface AID Solvent Blend-1 QT-\$16.91/1 GALLON-\$24.95 OR **\$99.95 per 5 gallon**

SDI Surface AID is a proprietary blend of solvents designed to aggressively re-liquify "already-applied" sealers and hold the surface coating to a liquid state for an optimal length of time to clarify, re-new, and re-bond the coating. SDI Surface AID is an excellent product for clearing bubbles, blushing, minor whitening, and re-bonding some delaminated sealers. It may also be used to dilute some solvent-based sealers for re-seal applications or thin down overly applied applications.

Skid-Tex - Non-Skid Additive For Sealers, Paints, and Coatings

\$4.98 per 1 lb Jar

Skid-Tex is a **BROADCAST** additive to prevent slips/falls. One pound per 5 gallon pail is recommended.

Kung Fu Grip - Extra Fine Non-Skid Additive For Sealer

\$12.95 per 1lb Jar

Kung-Fu Grip is recommended for decorative applications because of its size; it becomes virtually invisible while still adding slip resistance.

****MIX-IN SEALER METHOD****

Hot Strip - Sealer/Coating Remover-1 GALLON-\$38.18 OR **\$172.13 per 5 gallon**

Hot Strip is a blend of solvents and chemicals designed to soften and lift coatings from concrete surfaces. Hot Strip should be poured onto the surface and worked in with scrub brush. Allow a dwell time of 15 minutes and re-wet surface again with Hot Strip and scrub lightly. Remove coating and excess Hot Strip by combination of squeegee and Pressure-washer. Chemicals in Hot Strip are dangerous and flammable. Take care to wear protective clothing and goggles and avoid contact with skin, eyes, and direct inhalation. Pre-soak all surrounding plants, grass, etc. with fresh water.

Soy Gel- Eco-Friendly Coating Remover- 4 OZ BOTTLE-\$3.25(SAMPLE)

\$284.95 per 5 gallon

Soy Gel is a user & environmentally friendly stripper for acrylic sealers & thin-build epoxy coatings. Apply at a rate of **125 ft² per gallon and allow gel to work**. Do not remove until

\$162.45 per 2.5 gal bottle

\$69.95 per gallon

coating is softened down to the surface. Outdoor projects can be covered to allow extended working time. Remove softened coating with a squeegee or scraper. Reapply if necessary. Clean with a degreaser prior to applying a new coating.

Fritz Pak Concrete Admixtures

Mini-Delayed Set - 1 CASE (60 BAGS)-\$345.00/	\$5.75 PER BAG
--	-----------------------

Mini- Delayed Set will slow/retard the curing rate of concrete. Use at the rate of one bag per cubic yard of concrete, effectively putting it to sleep' for approximately one hour.

Standard Delayed Set	\$14.50 PER BAG/ CASE (18 BAGS)-\$261.00
-----------------------------	---

Simply for bigger jobs than the mini set, Standard Delayed Set will also slow the curing rate of concrete for approximately one hour. Each bag of the the standard delayed set will work for 4 - 5 yards of concrete.

Control Finish Finishing Aid	\$12.95 PER BAG/CASE (30 BAGS)-\$388.50
-------------------------------------	--

Control Finish improves concrete surface finishing characteristics without re-tempering with water, thus avoiding many common surface problems such as plastic shrinkage cracks, dusting, cracking and crazing. Sprayed on lightly and troweled in, Control Finish produces a high quality surface that is easy to finish and extremely durable. Makes stamping and addition of color hardeners much easier.

Supercizer II Super Plasticizer	\$8.78 per bag
--	-----------------------

Supercizer II is a super plasticizer designed for warm weather. It will increase the slump of concrete up to 7" , and can achieve up to 20% water reduction, to limit shrinkage and increase place-ability. Normal dosage is one bag per cubic yard of concrete.

Supercizer 3 Super Plasticizer	\$10.16 per bag
---------------------------------------	------------------------

Supercizer 3 is a super plasticizer designed for colder weather. It increases the slump of concrete up to 6" and can achieve up to 25% water reduction. Improves concrete workability while increasing its strength. One bag recommended per yard.

COUNTER-FLO (8LB)-\$82.07	
----------------------------------	--

Specifically designed for use in the production of concrete countertops and concrete statuary

★ Concrete Overlay, Repair and Coating Systems ★

Brickform Stampable OVERLAY is formulated for resurfacing and texturing existing, interior or exterior flatwork. Properly profiled substrate should be primed with Brickform Triple 7 prior to application. Each bag is mixed with ONE Brickform Liquid Colorant and 5-6 Quarts of water. Spread material to required depth with a gauge rake.

**Coverage: One Bag
will cover 23 Sq Ft.
at 3/8" Depth ★**

5 gal Pail	Triple 7 Bond Coat	\$114.95
1 gal Bottle	Triple 7 Bond Coat	\$28.95
60 lb Bag	Stampable Overlay	\$42.75
10 oz Bottle	Liquid Colorant	\$8.50 each (most colors)
Average cost at 5/8"-		\$2.25 / ft ² (Includes Antique & Sealer)

★ Brickform SM Professional Grade ★

B.F SM ProGrade is a two-component polymer modified cementitious overlay that can be sprayed or trowelled to resurface interior or exterior surfaces. Profiled surface should be primed with Triple 7 Bond Coat prior to application. Mixed with 6.5-7.5 quarts of SM Polymer and can also be colored with Brickform Liquid Colorant. Apply with a hopper gun or trowel. Each bag covers 150-250 ft depending on application. Trowel applications can be topped with Brickform Microtopping for smoother finish.

SM Professional Grade	60 lb bag	\$29.10
SM Polymer	5 gal pail	\$99.95
10 OZ bottle	Liquid colorant	\$8.50 (Most Colors)
40 lb bag	Microtopping SG (Gray or White)	\$27.95
Triple 777-	1 Gallon-\$28.95/Ea	5 Gallon-\$114.95/Ea
Average cost (2 coats SM only):		\$0.60 / ft ²

★Miracote Protective Coating (MPC) Multi-Purpose Protective Coating★

Miracote's **FLAGSHIP** cementitious overlay. MPC can be mixed to a trowel grade, both vertical and horizontal, brush, squeegee, roller grade, as well as spray grade for low-pressure hopper gun applications and knockdown finishes. MPC is a multi-component, flexible, versatile topping that can be colored prior to application as well as stained after it is installed. MPC Powder comes in two base colors which can be pigmented, and two finish grades. One bag of MPC mixes with 2.5 gallons of Miracote Liquid Catalyst to cover an average of 250 square feet per coat.

MPC Powder Natural Gray Regular-	\$32.66 each
55 lb. bag Smooth-	\$23.23
MPC Powder White-Regular-	\$33.85 each
Smooth-	\$25.93
Miracote Liquid Catalyst 5 gal pail	\$113.30 each

One pail of Liquid Catalyst can be pigmented with a SINGLE pack

Average cost for 2 coats (UNCOLORED): \$0.66 / ft²

Miracote Repair Mortar - Type I (RM I)

RM I is a polymer-modified, two-component smoothing and resurfacing compound for concrete floors and decks. RM I can be applied by trowel from a featheredge up to 3" over properly prepared surfaces. RM I is designed to maximize adhesion and minimize shrinkage while developing high compressive strength. Common uses include resurfacing and re-leveling of interior and exterior concrete surfaces. Three 50 lb. bags of RM I Powder mixes with two gallons of the RM I Liquid Polymer should cover 57 ft² @ 1/4" with a cured color slightly darker than concrete.

50 lb. bag	RM I Gray Powder-White	\$17.96 each
	Gray-	\$17.26
5 gal pail	RM I Liquid	\$109.86 each
Average cost @ 1/4":		\$1.69 / ft ²

CMP LF-210

LF-210 is a cementitious, non-shrinking, self-leveling floor underlayment designed for interior use. This single-component material mixes with water and is applied over a primed surface to provide a smooth, new floor surface from featheredge to 4" in multiple lifts or when used in conjunction with stone aggregate. LF-210 may be poured or pumped onto the primed concrete surface, spread to desired thickness with a gauge rake and allowed to level off. LF-210 should be walkable within 2 hours and should accept floor covering within 12 hours from time of installation. CMP AS-100 is mixed 1:1 with water and then brushed onto the surface, then allowed to dry to the touch. One diluted gallon will cover 400-500 ft².

One 50 lb. bag of LF-210 mixed with 5.5 quarts of water should cover 50 ft² @ 1/4" thickness.

CMP LF-210-	50 LB Bag-	\$29.50 each
AS-100 (Concentrate)-	1 Gal-	\$70.20 each
Average cost @ 1/8":		\$0.65 / ft ²

Gallons-\$51.00. Covers 200 Sq Ft

HYDRA-TINT™ Water-Based Concrete Stain System

USAGE GUIDELINES

The HYDRA-TINT™ Stain System was developed for use on concrete floors, but can also be used to improve the appearance of concrete walls, columns and other vertical decorative concrete features. One gallon covers 200-300 SF per coat depending on porosity of concrete.

PREPARATION

If the concrete surface does not repel water and is not a really hard troweled surface then little or no prep work is required. Any previously applied sealer, paint or other oil-based products must be removed. If the surface is such a hard troweled slick finish that HYDRA-TINT™ cannot penetrate, then light sanding/grinding or etching is required. APC Precision Clean and Etch can be used to open up the surface. If surface has been sanded/grind it must be cleaned with APC Cleaner Degreaser Neutralizer and brushed to get all sand particles up from pores of concrete. Rinse well and wet-vac floor while it is wet. Test area where sanded with stain to make sure there is porosity in the slab and all dust is removed.

MAKE SURE YOU TEST AN AREA ON SITE BEFORE APPLYING.

CURING

Concrete should be allowed to cure a minimum of 28 days. In cooler climates curing time could require more.

APPLICATION

HYDRA-TINT™ can be sprayed, squirted, mopped, painted or rolled. Care must be taken to avoid or cover up straight lines associated with rolling. HYDRA-TINT™ may be applied full strength or can be diluted with water to get a lighter hue of color.

HYDRA-TINT™ color is built-up and may require repeat applications, depending on the porosity of the concrete. It is not recommended to use on extremely porous substrate such as concrete blocks. For extremely porous surfaces 1/2 to 1 pint of Min-Wax water based polyurethane can be added per gallon of HYDRA-TINT™ to decrease the absorption and give you desired color without using as much product. The use of polyurethane not only speeds up the job, but is more cost effective when using large amounts of HYDRA-TINT™.

When using a single color of HYDRA-TINT™, the first step is to apply completely over the entire surface. A single color of HYDRA-TINT™, in a single application, achieves mottling by the varying degrees of porosity within the surface of the concrete. Additional "acid" effects are achieved through further applications, either in complete coverage or random, haphazard applications. Further applications depend on desired look and porosity of the concrete.

TECHNIQUES

The results that can be obtained by using HYDRA-TINT™ have been limited only by imagination. Here are some guidelines or pointers....

- When using multiple colors, apply the lighter colors first (however, yellow can be applied over red to "orange" it up a bit).
- Color can be mixed in any fashion. They can be mixed before application and will actually separate a little to produce mottling by slightly different colors. More control and distinct color is achieved by building one color on top of another.
- Spraying to some saturation, even puddling, following by blotting or swirling has produced some attractive results. The edges of puddles will leave very distinctive veining, upon drying.

SEALING

Allow concrete 24 hours to dry. To provide long lasting durability and to enhance the color, apply **APC Super Poly**, a two component sealer on interior floors. On exterior floors seal with **APC Precision Premium 30** a non-yellowing solvent based sealer. Two coats of **APC Wax Polish** should be applied over sealed interior floors for additional protection and enhancement. Use of **APC Wax Polish** will diminish slipping and scuffing. **APC Wax Polish** may be applied with a lamb's wool applicator or microfiber pad. As a maintenance routine, **APC Wax Polish** will prevent the need to reapply sealer. Clear sealer is required to enhance the depth of color and should be tested before application.

WARRANTY DISCLAIMER

The facts stated and recommended regarding APC products are based on our own research and the research of others, and are believed to be accurate. November 2017

Made in the USA

For professional use only

Consult Material Safety Data Sheet before use.

McCalla, AL 205-938-3065 • Phoenix, AZ 480-268-9335

HYDRA-TINT by APC is designed as a environmentally safe, user friendly alternative to traditional acid based stains. The HYDRA-TINT™ system is a penetrating, waterborne pigmented stain formulated specifically to stain concrete or cementitious toppings. The HYDRA-TINT™ system is for use on cured concrete that is uncolored,color hardened or integrally colored. It's also compatible with horizontal/vertical overlay systems. The system includes a complete line of cleaners, sealers and a wax polish product that are required for long-term durability and long-lasting colors. Color shown is a sealed representation of the base color of the concrete stain. Variations will occur from slab to slab and a application test is recommended before final application.

CHIPS UNLIMITED

Vinyl chips (or flakes) are broadcasted into epoxy coatings to create decorative or textured finishes. Chips are available in multiple sizes (1", 1/2", 1/4", 1/8", 1/16" & 1/32") and are custom blended with your choice of one color up to five colors. Full broadcast coverage varies by size from 2-10 ft² per pound. Custom blend tool available at www.chipsunlimited.com . Price includes shipping to our warehouse in Cinnaminson.

\$3.70 PER pound (Comes in 55 lb box)

Stamped Overlay

Renew-Crete stamped overlay is a single component product that requires only water, polymer is pre-blended in each bag for easy application. After appropriate surface prep has been completed and the substrate has been misted with water.

Renew-Crete Bond Coat Mix should be applied with a squeegee at a rate of 150-200 ft² per bag. Renew-Crete Stamp Mix Complete should be spread with a gauge rake to desired thickness. Stamp Mix should cover 23ft² at 3/8".

Stamp Mix Complete	60 lb bag	\$28.50 per bag
Color Pack		\$4.95 each
Color Pack (except Philly Blue)		\$11.55 each
Bond Coat Mix	45 lb bag	\$45.65 per bag
Average cost @ 5/8":		\$1.75 / ft ²

Spray Coat-LIGHT-BASED/STAIN-BASED

Renew-Crete Spray Coat is a single component product used where a textured, knock-down finish is required. Appropriate surface prep should be completed and the substrate should be dampened prior to application. Apply the base coat with a squeegee or trowel at 1/16". After the base coat is allowed to dry, apply tape or stencils as needed prior to the spray application. Apply the spray coat with a hopper gun and lightly trowel down the material. One bag of Spray Coat should cover 90-135 ft².

45 lb bag	Spray Coat Mix	\$29.25 per bag
	Kraft PC401 Texture Sprayer & Hopper (left)	\$123.95 each
	Average cost (Two Coats):	\$0.30 / ft ²

Roll Coat

Roll Coat is a blend of Portland cement and polymer used to color any unsealed concrete surface. Roll Coat can be used to re-color old stamped concrete projects or to blend multi-pour projects that have color issues. One 5 gallon pail is mixed with 2 color packs and should cover 400-600 ft². Roll Coat requires a two coats and should be applied with a heavy nap roller (3/4")

Roll Coat	5 gal pail-	\$139.95 Per Pail
Average cost:		\$0.15 / ft ²

Patch-It

Patch-It is a polymer modified patching compound that can be used to repair substrates prior to the application of an overlayment, or on its own as a topping. Patch-It can be used from featheredge to 1" thickness in a single application, thicker applications require multiple lifts. One 50 lb bag should cover 25ft² at 1/4".

Patch-It Light Base	(Can use color pack)	\$35.26 per bag
Patch-It Stain Based	(For use with acid stains)	\$29.70 per bag

Re-Coat

Re-Coat is a polymer modified resurfacer designed to accept a broom finish. Re-Coat should be applied to a damp substrate with a squeegee at a rate of 150-250 ft² per bag. After the material has dried slightly follow with a broom. Re-Coat is a white product that can be used with a color pack.

45 lb bag	Re-Coat Light Base	\$35.26 per bag
	"Stain Based"	\$29.70 per bag
	Average cost (w/ color) :	\$0.25 / ft ²

Concrete Stamping Tools

(Sizes are NOT relative)

A vast selection of MATCRETE & PROLINE patterns, tools, and accessories are available for purchase. SDI stocks several patterns for both sale and rental use. All patterns not in stock are subject to a shipping and handling charge additional to the cost of the tool(s). TOOLS LISTED BELOW ARE REGULARLY STOCKED ITEMS

Universal Tool-\$6.25**

Caulks and Selants

RCS20-\$2.42/ea or \$29.04/Box 10.1 OZ

Acoustical sealant is most effectively used to seal out airborne sound in walls, doors, ceilings, and floors. It is also used to dampen sound in wall systems and to fill cracks, joints, and cutouts that transmit noise. RCS20 applies easily without a primer. Clean up is simple with just soap and water. It's paintable, too, so it can be blended into virtually any environment

Soudal

Made of 100% silicone with a neutral cure, SCS2000 SilPruf sealant has the movement capability that complex designs require. It maintains its flexibility and strength, even after decades of exposure to weather and UV radiation. Air and water tight, it can protect window perimeters, punched openings, flashings, and other critical junctions. Plus, it has the elasticity to handle high-force winds and severe impact.

**SCS2000 SILPRUF-\$6.94/ea or \$166.56/bx (depending on color)
10.1 OZ**

With its easy application and fast-cure rate, SCS2800 SilGlaze II sealant is an excellent candidate for projects that require immediate handling—constructing and installing doors and windows, field glazing, or general-purpose sealing. It is highly resistant to UV radiation and extreme weather, and remains permanently flexible for a long service life.

**(WAS 1800 Series) Now- SCS2800 SilGlaze II-\$4.99/ea or \$119.76/bx
10.1 OZ**

SCS1000 Contractors 100% silicone is a one-part, sealant used for sealing and glazing, bedding and grouting tile, sealing countertops, fixtures, and drains, and more. The non-sag paste applies easily and quickly attains weather-resistant properties. It won't crack, separate, or dry out, even after years of exposure.

**SCS1000-\$4.65/ea or \$111.60/Bx
10.1 OZ**

Soudaseal AP (All Purpose) is a one part, high quality, gun grade, moisture curing, elastomeric waterproofing and sealing SMX® sealant designed for general construction. It has excellent bond strength to nearly all porous and non-porous substrates without the use of a primer.

**Soudal AP-\$5.19/Ea or \$62.28/Bx (Prices vary with each color)
10.1 OZ**

Soudaseal Self Leveling is a SMX® sealant designed to offer superior adhesion to concrete as well as a wide variety of substrates with a smooth finish, which allows installation without tooling.

**Soudal SL- \$16.30/ea or \$195.60/Bx
Quart Tubes (29 OZ)**

Roadware Section

Roadware MatchCrete™ Clear (MCC) is a two component aliphatic polyurethane for repairing cracks, spalls, and joints in concrete subject to UV exposure from sunlight. This material is clear in appearance when applied and cured. Colored sand and pigments may be added to create color stable repairs that match most any decorative style or shade of concrete surface. MCC will not significantly change color with exposure to sunlight over time. Use for repairing floor imperfections prior to concrete polishing or repairing damaged polished concrete.

Comes in 50 ml/600 ml kits

50 ML-\$15.00

600 ML-\$67.50

Roadware 10 Minute Concrete Mender™ is a two-part polyurethane that penetrates deep into concrete to make permanent repairs. Nearly thin as water at less than 9cps, Concrete Mender™ actually injects itself into the matrix of the concrete and shores up the existing concrete as well as making the repair. Concrete Mender™ eliminates the bond-line as it Micro dowels into the concrete. We call it Micro Dowling™.

Comes in 50 ml/600 ml kits

50 ML-\$15.00

And 2 Gal kit

600 ML-\$65.40

2 Gal kit-\$340.77

"Z" Sealers

SOME OF OUR SEALERS FOR COUNTERTOP'S

Aqua-Thane M35: A water-based polyurethane that forms an impermeable topical shell to offer some of the best stain protection and scratch resistance. Is applied in thin coats with a roller and **WILL NOT** darken or "wet out" the concrete. Has a low luster matte to satin finish.

Part A and B (KIT)-\$49.00

Coverage- 50 to 75 Sq Ft @ 2 coats

Z SiAcryl 14: Easy to apply penetrating sealer. Satin finish. Will **NOT** alter color of concrete or leave residue on concrete surface. Z Countersheen Polish can be added to increase gloss. Only sealer recommended for outdoor countertops.

\$39.00/Each

Coverage-1 qt. (946ml) per bottle. Will cover approximately 75-100 sq ft @ 3-4 coats

Z Aqua-Poxy: 2 part, easy to apply epoxy sealer. Semi-gloss finish. Will slightly enhance coloring of countertop without darkening. Put on multiple coats to build up thick epoxy look.

Part A and B (KIT)-\$79.00

Coverage-75 to 100 Sq Ft @ 2-3 coats

Aqua-Thane G40: A water-based polyurethane that forms an impermeable topical shell to offer some of the best stain protection and scratch resistance. Is applied in thin coats with a roller and WILL darken the concrete. Has a gloss finish.

Part A and B (KIT)-\$54.00

Coverage-50-75 Sq Ft @ 2 coats

Trowel-Slick is a ready to use surface lubricant which allows for easier concrete finishing. For veteran finishers it allows for great finishing with far less labor. For novices it allows you to finish like a pro. Trowel-Slick is ideal for concrete countertop finishing.

\$19.00/Each

COVERAGE: Approximately 50 - 75 sq. ft. per quart.

Counter-Shine adds an additional layer of protection and gloss. Z Counter-Shine can be applied in layers which will intensify the gloss with each additional application. To be used over SiAcryl 14 or similar penetrating sealers **ONLY** (Will not work with Ultra SI). Safe for outdoor use and 100% countertop safe.

\$39.00/Each

1 qt. (946ml) per bottle. Will cover approximately 200-250 sq. ft. @ 1 coat

Z Counterform Countertop Mix is a pre-blended, all in one, high strength castable concrete mix designed for the creation of concrete countertops. It offers the very best blend of white sand and marble aggregates, white Portland cement and proprietary admixtures to ensure no curling, shrinking or deformation. The use of a specialized acrylic fiber network and the high flexural strength greatly limits the chance of cracking. This highly flowable, near self-leveling mix makes Z Counterform Countertop Mix the perfect choice for both your precast and cast-in-place designs and can be cast as thin as 7/8" for countertop applications.

COVERAGE: 0.43 cubic ft. per bag - 3 sq. ft. @ 1-5/8" (Standard Z Counterform) - 1.9 sq. ft. @ 2-5/8" (Commercial Z Counterform) - 5.1 sq. ft. @ 1" (Euro Z Counterform) - 2.5 sq. ft. @ 2"

CONCRETE COUNTERTOP SOLUTIONS

Easily and safely remove concrete from your tools and equipment with Mean Klean concrete dissolver and mortar dissolver. The advanced liquid formula dissolves and physically breaks down dried concrete by attacking the Portland cement, eventually reducing it to mush that's easy to clean off with a hose or pressure washer. Mean Klean is the green, non-fuming, eco-friendly alternative to harsh acid cleaner.

\$45.00 PER GALLON

NewLook Endura Solid Stain is a contractor grade, single component concrete stain that is highly durable and easy to use. Use Endura Solid Stain to stain concrete, restore faded concrete or maintain concrete. Endura Solid Stain is affordable while being premium in quality & performance. The product is contractor grade and compatible with NewLook's extensive line of products.

1 gallon covers approximately 250 square feet per coat (2 coats for solid coverage)

\$23.33/QT-\$72.15/GAL

Semi-Transparent Concrete Enhancer

1 gallon covers approximately 300-400 square feet per coat

Endura Enhancer refreshes your worn, stamped or smooth concrete to give it a two-toned finish. Endura Semi-Transparent Enhancer works similar to both the Designer Series Enhancer and Translucent Enhancer but it comes ready to use as a single component concrete stain.

Endura Semi-Transparent Enhancer is less opaque than Endura Solid Stain. Endura Semi-Transparent Enhancer can be used to create a layer effect by either putting them on top of each other, on top of Endura Solid Stain or as multiple layers on top of bare concrete.

Endura Enhancer™ is a very versatile stain that can be used for both exterior and interior concrete.

Endura Enhancer™ provides a tough, durable stain for applications such as patios, driveways, basements, walkways, pavers, blocks and stucco walls.

\$64.00 PER GALLON

Endura Translucent Enhancer

1 gallon covers approximately 300-400 square feet per coat

Got worn, faded exposed aggregate? Endura Enhancer Translucent concrete stain is the best solution on the market for restoring exposed aggregate! The water-based, translucent formula creates a vibrant, yet natural-looking color tint that refreshes the exposed aggregate surface while still allowing the aggregate tones to show through the translucent tint.

Tip: Use a darker Enhancer color over a lighter base color to create color contrast when antiquing stamped concrete.

\$64.00 PER GALLON

SmartSeal WB (Water Based Sealer)

COVERAGE-300 TO 500 PER GALLON

The water-based formula is used to protect all NewLook concrete stains, properly prepared concrete floors, pool decks and other concrete and masonry surfaces.

SmartSeal WB dries quickly and, once cured, creates an abrasion-resistant film that provides weatherproof protection against sun, rain, most acids, industrial chemicals, oil and grease.

SmartSeal WB complies with all environmental regulations (VOC < 100 g/L).

250 to 400 sq. ft. per gallon – Unsealed Surfaces

SmartSeal AU-25™ is a water-based, nano-acrylic-urethane, 25% solids sealer.

400 to 600 sq. ft. per gal-Stained/Sealed Surface

SmartSeal AU-25 is designed for use over NewLook SmartColor™ and

other NewLook concrete color stains, properly prepared concrete floors, pool decks, and other new or old concrete and masonry surfaces. SmartSeal AU25 is breathable, VOC<20 g/l, will not blush or yellow and dries quickly to a satin or gloss finish. It has strong abrasion and chemical resistance, good hot/wet tire pickup resistance, and will resist discoloration from dirt and most common spills. The sealer will enhance the color of the substrate when

applied in two coats and is formulated for exterior and interior use. SmartSeal AU-25 covers well over substrates previously treated with latex coatings

and acid stains. Great for surfaces that require a higher-end, yet cost-effective finish and holds up very well to traffic such as retail stores, restaurant floors,

industrial floors, garages, etc. *Also performs very well over decorative concrete including stained and stamped concrete*, overlays, natural/manufactured

stone, concrete counter tops, pavers and exposed aggregate.

Standard Backer Rod is an ideal non-absorbent compressible material inserted into a joint to control sealant depth. It creates a backstop to allow for proper sealant tooling. Backer Rod is commonly used in glazing operations, window and door applications, expansion joints, curtain wall joints, partitions, log construction, pavement joints and repair, and precast units and copings among many other job applications.

Standard Backer Rod is an extruded round, closed cell, low-density polyethylene foam material with a skin-like outer texture. It is highly flexible and compressible for easy installation; however, it is important to make sure that one does not puncture, stretch, or overly compress Backer Rod.

SIZES FOR STANDARD CELL-

4" - 54' IN BOX - \$85.63	1.25" - 400' IN BOX - \$62.02	7/8" - 850' IN BOX - \$60.95

Soft Backer Rod is a soft, gray, pliable, non-gassing backup material inserted into an expansion or contraction joint to: control sealant depth, create a backstop to allow for proper sealant tooling, ensure sealant adhesion to joint surfaces only, and, yield a proper bond break between backup material and sealant.

Soft Backer Rod is particularly well suited for specialty applications where standard backer rods are not appropriate. Soft Backer Rod is ideal in irregular joint applications where self leveling, flowable sealants are employed. Soft Backer Rod is also recommended for use with sealants where bubbling concerns are critical. It is compatible with all known cold applied sealants including butyl, polysulfide, acrylic, polyurethane, and silicone.

Deco Guard is a non-yellowing, **LOW SHEEN**, Siloxane Modified Methyl Methacrylate with a low viscosity for better penetration on concrete substrates. Deco Guard's unique Siloxane Modified Methyl Methacrylate formulation provides superior water and salt resistance compared to standard sealers used to protect exterior concrete. Improved resistance to deicing road salts, pool decks with salt water pool systems, rain, sleet and snow are achieved due to our advanced chemical reactive formula. Deco Guard also meets cure & seal specs ASTM C-309, Type 1, Class A & B, AASHTO Spec M-148, Type 1, Class A & B so it can be applied directly to freshly poured concrete!

★ **BRAND NEW** ★

**BAGS COME IN SMALL AND LARGE SIZES,
★ READY TO TAKE ON ANY JOB! ★**

ColorFlo SG Granular- Pigment is unlike any other on the market. This innovative method creates a pigment with easy flowability, tighter particle size tolerances, reduced dust formation, and color development that meets or exceeds that of any competing granular pigment in both wet and dry slump conditions.

GRANULAR DISPENSING-

ColorSelect and QuickColor granular systems accurately and efficiently dispense SG Granular pigment. Solomon Colors has granular dispensers for any Ready Mix, Precast, and Paver and Block application. Create thousands of colors from just 4 primary colors.

**COMES IN THE SAME GREAT COLORS
YOU'VE COME TO LOVE, NOW IN POWDER!**
115- Yellow ,413- Light Red ,417-Dark Red ,920-Black
